

# NIE - Practice Exam

## Overview

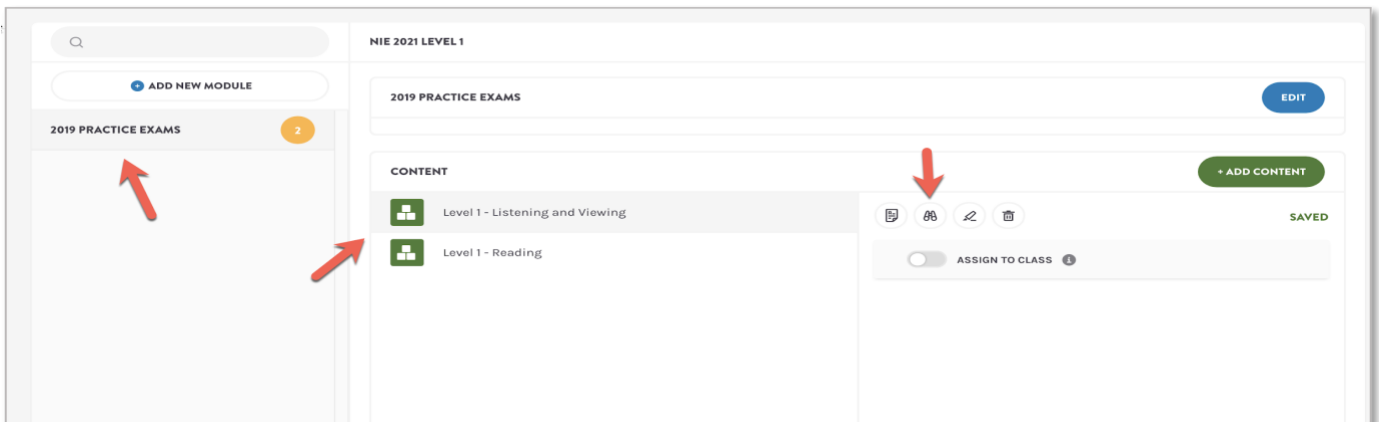

Each NIE course comes with a practice exam as well. Instructors and students alike can access them. First, you'll need to start on the course dashboard page for your particular NIE course. You can select an NIE course from the "Courses" list:

Next we'll navigate to the "Modules" page to see the contents of this course:

Here you can see “2019 Practice Exam” module on the left and the two assignments for the practice exam (Listening and Viewing, Reading) in the middle. Once you select an activity, you can click the little binoculars icon on the right to preview the material. This will show you the content exactly as your students would see it.

**Note:** The “Modules” page looks a little different to your students. When they click on “Modules” from the course dashboard, they’ll just see the list of modules and activities. They can click on an activity to view it:

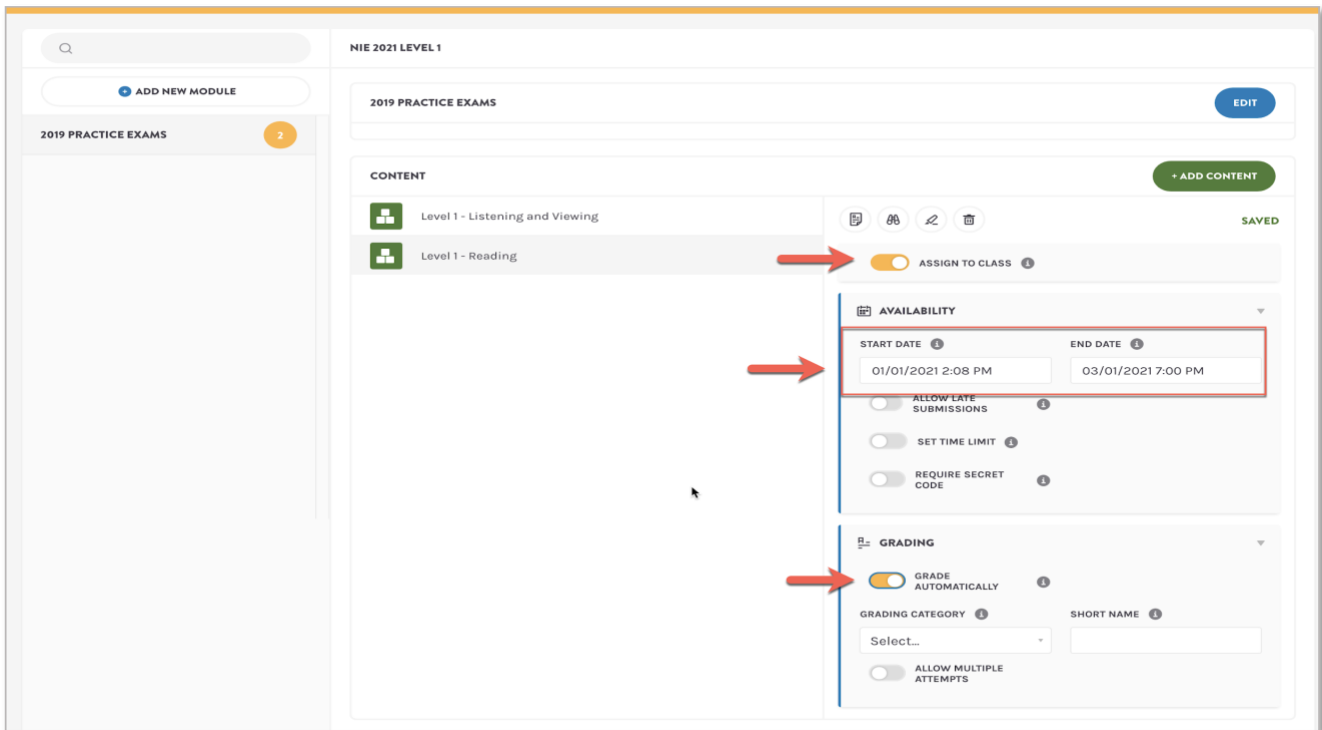

2019 PRACTICE EXAMS		
CONTENT	END DATE	COMPLETE
 Level 1 - Listening and Viewing		<input checked="" type="checkbox"/>
 Level 1 - Reading		<input checked="" type="checkbox"/>

## Grading

By default, students will be able to view the practice exam content, but they won't be able to see if they've gotten the practice questions right or wrong. You can enable this feature by making a few small changes to an activity's settings.

In the example below, I've selected the "Reading" activity, and then I've turned on the "Assign to Class" switch. Next, I've made sure the start and end dates are set correctly, and then I've turned on the "Grade Automatically" feature:

**Note:** You will need to make these changes to both activities if you want both to be graded.

The screenshot shows the settings for the 'Level 1 - Reading' activity. The 'ASSIGN TO CLASS' switch is turned on. The 'AVAILABILITY' section shows the start date as 01/01/2021 2:08 PM and the end date as 03/01/2021 7:00 PM. The 'GRADING' section shows the 'GRADE AUTOMATICALLY' switch is turned on.

With these settings in place, a student can view this activity, answer the questions, and then submit the assignment to see if they've answered correctly:
